RELEVANCE FOR RESILIENCE

Radical ReThinking for Technology, People, and Process

Featured Speakers:

David Finn
EVP Strategic Innovation
CynergisTek

George Crawford
CIO/CISO
Catapult Energy Services Group

Jesse Carrillo
CIO
Hines

Moderator:

Harvey Nusz
President
ISACA Greater Houston

Abstract: At the heart of Radical ReThinking is resilient practices for continued relevance. Intelligent data management, effective resource application and automating processes will both mitigate risk while increasing speed to market. By automating menial repetitive tasks, resources can be redirected for improved efficiency. With the implementation of disruptive technologies, data protection and data privacy improve. Adoption of advanced analytics and artificial intelligence enable successful governance initiatives while increasing customer loyalty through seamless tasks. The digital revolution requires radical rethinking to maintain relevance.
